

HIGH PERFORMANCE. HIGH TECHNOLOGY. HIGH QUALITY.

HI-Q Range is a complete range of innovative solutions combining our Plant Stimulating Peptides and a high content of micronutrients, for a strong nutritional and biostimulant action.

The presence of PSP, coming from the Vegetal Protein Hydrolysates (VPH), improves the ability of plants to absorb nutrients in order to better prevent or cure nutritional deficiencies and disorders.

All **HI-Q** solutions are to be applied foliar, so that the action is even quicker and effective.

HI-Q K is designed to prevent and cure Potassium deficiencies. It is ready to use and thanks to its high solubility and assimilation ability, it helps plants to quickly overcome the stress induced by nutritional imbalance, also improving fruit quality.

COMPOSITION

Potassium Oxide (K ₂ O) water soluble	20% (250 g/L)
VPH (vegetal protein hydrolysates)	10% (125 g/L)
pH (1:5)	6,2
Specific weight	1,25 kg/L

ADVANTAGES

- Strong nutritional and biostimulant action
- It increases the nutritional balance in order to obtain a better quality of the yield
- Prevention and treatment of K deficiency
- It improves nutrient use efficiency

PLANT STIMULATING PEPTIDES INSIDE

HELLO NATURE pioneer in new biotechnologies, has developed a unique production process based on Vegetal Protein Hydrolysates (VPH) and resulting in Plant Stimulating Peptides (PSP).

- 100 % vegetal origin
- Prominent, assured and natural biostimulant effect
- No-GMO, and safe product for crops and humans (low salinity, no antibiotics nor heavy metals)

- Improvement of quality traits
- Enhancement of nutrient uptake and assimilation
- Increase of stress resistance of the plant

← **Activation of cell response**

USE AND DOSE

All dosages provided are in standard conditions, dosages and modes of application are to be determined on the basis of the requirements and the nutritional status of the crop.

We recommend the application in the coolest hours of the day (morning or evening) to obtain maximum absorption by the leaves and the best effectiveness.

HI-Q Range can be mixed with the most common phytosanitary products and fertilizers on the market. Before using we recommend testing on a small surface for compatibility with other products.

Liquid fertilizer for foliar application (on leaves).

Crops	Application rate	Application stage	Number of applications
Vegetables, ornamental, medicinal and aromatic crops	3 – 5 L/Ha	During crop development	Every 10 – 15 days
Woody Perennials (grape, berries, fruit trees...)	3 – 5 L/Ha	From fruit enlargement	3 to 4 applications

PACKAGING

1 – 5 – 20 L and 1000 L IBC
